ABOUT ME

I'm a self-taught programmer with a passion for following documentation and staying up-to-date with industry trends. My approach to work is structured, methodical, and team-oriented. I excel in environments with clearly defined goals and deadlines, and I'm proactive in seeking ways to improve processes and increase efficiency.

WORKING WITH PASSION

SPSC

Developer Full-Stack | 2022 - Present

- At SPSC, as a DevOps Developer, I led end-to-end project delivery and managed a team of developers. I developed statistical models with interactive graphic interfaces, created inventory and video surveillance monitoring systems, and provided support for Docker services.

QUERUB

Developer Full-Stack | 2016 - 2022

- As a Full-Stack Developer at QUERUB, I was responsible for designing and implementing both front-end and back-end components of web applications, as well as managing database design.

MATERIALES JUAN EL PAISA

Developer (Marzo 2015 - Enero 2016)

- Provided Technical Support for Python and JavaScript point-of-sale systems, while automating internal processes and supporting networks. Acquired valuable programming and problem-solving skills.
